An Exo Studies Report
August, 2023

WHAT IF PRESIDENT BIDEN WERE TO DISCLOSE THE PRESENCE OF NON-HUMAN INTELLIGENCE AND TECHNOLOGY ON PLANET EARTH?

WE CONVENED A PANEL
OF 15 PARTICIPANTS TO
EXPLORE AND CATEGORIZE
A WIDE RANGE OF
IMPLICATIONS.

THIS IS WHAT WE FOUND.

This report may be freely circulated as is, with attribution.

Tom Curren, Roger Stack

INTRODUCTION

Those closely following events associated with UAPs and non-human intelligences over the past few years – and especially the last six months – are beginning to sense there might soon be formal recognition of non-human intelligences and technology on planet Earth.*

Such an announcement would have far-ranging and unpredictable consequences. In order to better envision the range of possible impacts, we convened with a panel of 15 people with a variety of expertise and perspectives on this issue. Together, we generated and categorized 91 possible implications.

Our hope is that these findings might contribute to some collective insights that help hasten and amplify the positive aspects of disclosure -- should it occur -- and dampen and mitigate the negative aspects of disclosure.

We welcome any partnerships that might contribute to that outcome.

* Note: UAP refers to Unidentified Anomalous Phenomenon, colloquially referred to as UFO's. NHI refers to Non-Human Intelligence, colloquially called ET's.

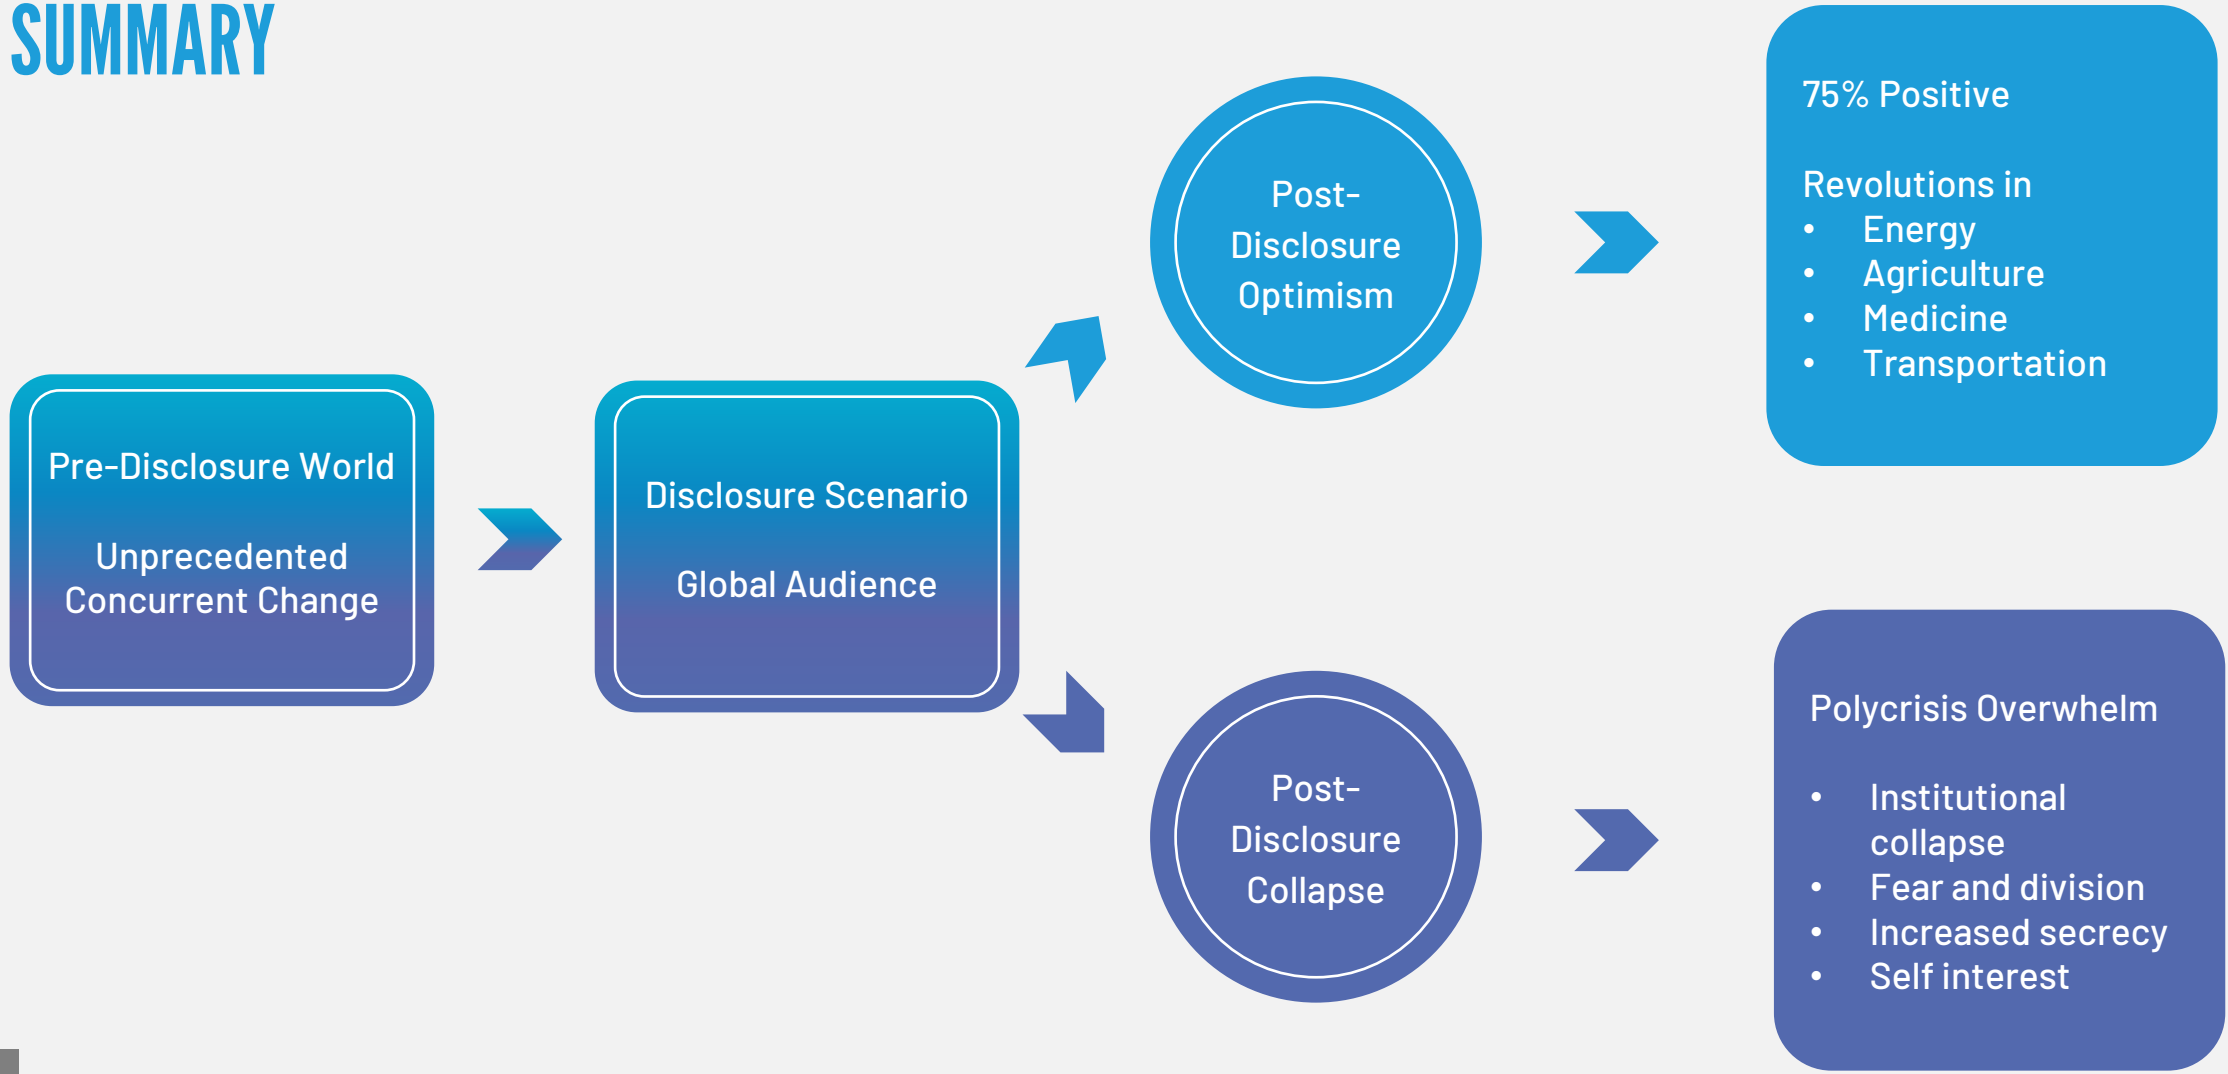

SUMMARY

- Our Pre-disclosure world. Any consideration of the implications of disclosure would, of course, happen in the context of our current global situation. To help set the stage, we briefly summarize the case for optimism in human progress, followed by the case for pessimism. Like many others, we conclude that our current challenges (due to their scale, interconnections, and the systemic issues driving them) represent a unique period in human history, requiring unprecedented global cooperation and systemic change. Nothing less than a profound shift in worldviews is indicated, toward greater connection, caring and wisdom.
- The disclosure scenario. The events of the last six months have been remarkable. We summarize these and describe how they lead into a hypothetical disclosure scenario by President Biden: *After consulting with the U.S. "Nine Eyes" intelligence-sharing partners (Canada, Denmark, Norway, Netherland, UK, France, Australia, and New Zealand), these leaders determine to make a joint announcement. The resulting set of coordinated press conferences are viewed by a global audience of 1.3 billion people.*
- The dynamics of post-disclosure optimism. 75% of the post-disclosure possibilities, we identified were considered "positive." For example, within the category of Spiritual/Psychological factors, there might be the emergence of a new world religion arising from a "We are not alone" narrative.
- In terms of Societal factors, the ET taboo and ridicule might fade given more specific/positive UAP reporting, reenforced by positive media coverage and affirmative Hollywood narratives. In addition, there might be more visible and transformative contact with NHI, a slow shift to a greater collective intelligence and a reinterpretation of human history in a galactic context. All these factors would create the momentum needed to awaken us to our full potential as universal beings. The "output" of this elevated collective consciousness, combined with positive implications about UAP technology, would be a revolution in energy, agriculture, medicine, and transportation.
- The possibility of post-disclosure collapse. On the other hand, humanity's efforts may be overwhelmed by the nature of the current "[polycrisis](#)" crisis and the negative possibilities following disclosure. A hard take on the current crisis might easily conclude that there are too many simultaneous crisis, with too much acceleration, too much interconnection and too deeply systemic. Major institutions may already be too fragile to handle the economic and psychological impact of disclosure. In addition, 25% of the possible implications of disclosure are negative, and many are highly significant. Fear and division may overtake hope and unity. Technology and alliances may remain hidden and used for narrow interests, not the greater good. In short, all the positive impacts may amount to "Too little and too late."

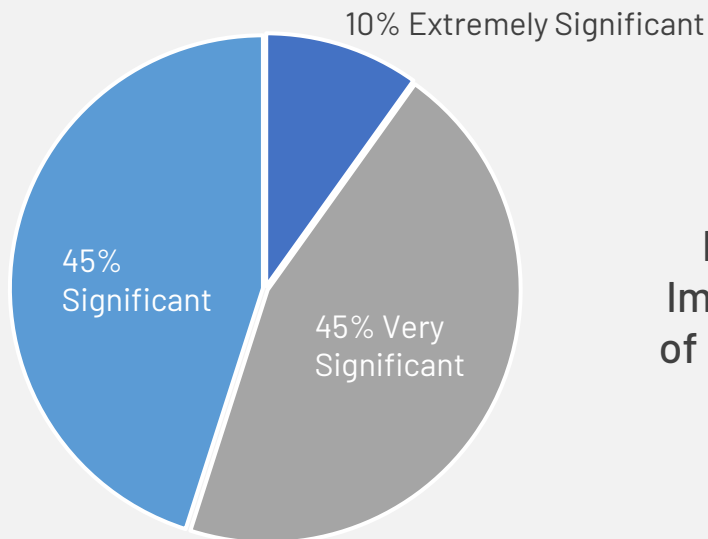

SUMMARY

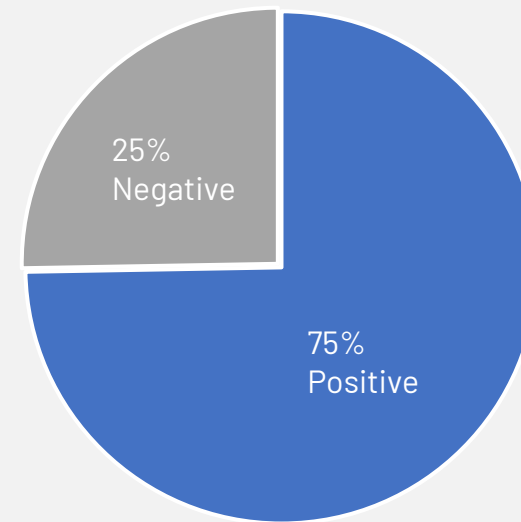

SUMMARY

- Summary of potential implications by category. Of the 91 implications, 9 were considered “extremely significant,” 41 “very significant” and 41 “significant.” 75% were considered “positive.” It is important to note that these do not reflect an assessment of likelihood for any implication. The question addressed was “If this were to happen, in the course of unfolding events, how significant would this be?”
- Nine potential “extremely significant” events. We chose to characterize two of the extremely significant events as “positive” because we felt they reflect a “necessary chaos.” These are “Soon things will get even more chaotic” and “Disclosure fractures society into groups.” The other possibilities on the list are unambiguous in their impacts. For example, “Some NIHS will become more proactive in making technology adaptable to addressing global crisis.” On the other side, “Some NHI elements appear to be pursuing goals not in alignment with human thriving.”

Possible Implications of Disclosure

SUMMARY

- Participant reflections. After participating in the process, we asked participants for their reflections on the process. Hopes were variations on the theme of the awakening of humanity to its full potential, in love, gratitude and acceptance. Expressed fears were more diverse: increased divisiveness, misinformation and resignation; disclosure gets co-opted by the power structures for their own purposes; UAP tech remains hidden or exploited by the powerful; NHI will not interfere (e.g. [Prime Directive](#)) and allow humanity to destroy itself.
- Takes-aways provided insights into the process of disclosure. To quote one participant, "I have a hard time seeing how disclosure just ends up being neutral or a shoulder shrug. I feel that it's going to be extremely positive or extremely negative. That may hinge, in large measure, on the desires or intentions of the NHI and how they want to relate with us. But we will play a pivotal role too, and I think we need to be prepared."

- The detailed findings. The final section of this report identifies all 91 implications and how there were scored. The categories are Overall Impact on Society; Psychology/Wholeness; Education and Training; Religion; NHI Engagement; Hybrids; Leadership/Authority; National Security State/U.S Government; and UPA technology.

Categories of Implications	
Overall Impact on Society	Hybrids
Psychology/Wholeness	Leadership/Authority
Education and Training	National Security State/ U.S Government
Religion	UPA technology
NHI Engagement

OUR PROCESS

- A lengthy list of potential implications was developed from a set of interviews and Zoom sessions, primarily with participants from Sean Esbjörn-Hargen's [Exo Studies Master Course](#). This list was augmented by recent podcasts and interviews by media figures active in the current disclosure dialogues (David Grusch, Leslie Kean, Ross Coulthart, John Ramirez, Richard Dolan, Diana Pasulka, Steven Greer, Daniel Sheehan, Steven Bassett, Garry Nolan, and others).
- From a list of over 100 potential implications, a panel of 15 Exo Studies participants selected their "top-10" positive implications and "top-10" negative implications. Note that most of these participants had completed at least a year of recent study into anomalous phenomena, including UAP, NHI and states of consciousness, from multi-disciplinary perspectives within an integrative meta-theory framework.
- Tom and Roger reviewed and edited this input to create a list of 89 implications. Each was tagged as potentially positive or negative. Implications were also evaluated as "extremely significant," "very significant," or "significant." These were obviously subjective judgments, open to other interpretations. **Note that these do not reflect an assessment of likelihood for any implication. The question addressed was "If this were to happen, in the course of unfolding events, how significant would this be?"**
- The Exo Community includes many people who have had extraordinary direct experiences, and a deep interest/knowledge in issues relating to non-human intelligences. Therefore, the list of potential implications includes topics that were deemed possible by this group. Those with a more mainstream orientation might consider some of these events "out-of-bounds," or at best, metaphysical speculation. For example, implications referring to recovered craft, human-ET hybrids, and/or deep secrets within the national security state.

THE PRE-DISCLOSURE WORLD

THE CASE FOR OPTIMISM IN HUMAN PROGRESS

Many make the case that the fundamentals are in place for continued human progress, despite the troubling headlines of the day.

- **Historical Improvement:** Historical data shows long-term reductions in violence and improvements in health, wealth, and democratic governance.
- **Technological Progress:** Continual advancements in science and technology expand our problem-solving capabilities.
- **Educational Access:** Increasing accessibility to education and information boosts collective human ingenuity.
- **Cultural Evolution/Integral Development:** Theories suggest societies evolve towards more complex, cooperative forms.
- **Integral Development:** Integral Theory and Spiral Dynamics propose that societies and individuals progress through stages of increasing complexity and inclusiveness.
- **Resilience and Adaptation:** Despite persistent global challenges, our problem-solving capacity evolves and improves over time.
- **Global Cooperation:** Growing awareness of global interconnectedness fosters international cooperation and collective well-being.
- **Human Potential:** The case for optimism is based on the belief in human potential, societal advancement, and the benefits of holistic and inclusive perspectives.
- **Learning from Past Success:** Recognizing past progress serves as a reminder of our capacity to tackle challenges using reason, science, collaboration, and expanded consciousness.

Source: ChatGPT/Tom Curren

THE CASE FOR PESSIMISM IN HUMAN PROGRESS

- **Existential threats:** Climate change, nuclear warfare, and pandemics pose immediate, existential threats to human survival. Unlike historical threats, these can cause irreversible damage on a global scale.
- **Interconnected crises:** Today's challenges – environmental destruction, economic inequality, political polarization, technological disruption – are deeply interconnected. Actions in one domain can unintentionally exacerbate issues in others, creating a complex web of problems that are challenging to untangle and address.
- **Acceleration of problems:** Climate change and biodiversity loss are occurring at unprecedented rates due to human activities. This rapid pace leaves little time for adaptation or mitigation.
- **Systemic issues:** Current economic and political systems (often criticized as overly focused on growth and profit) contribute to environmental degradation, social inequality, and other issues. These systemic drivers make problems persistent and resistant to change.

- **Inequality:** Global economic inequality is increasing, leading to social instability, undermining democracy, and slowing efforts to combat global challenges like climate change.
- **Ecological overshoot:** Humanity's demand on nature exceeds the Earth's ecological capacity to regenerate. This overconsumption of natural resources leads to ecological collapse and resource conflicts.
- **Biodiversity loss:** The current rate of species extinction, largely due to human activity, is unprecedented in human history and could disrupt ecosystems, impacting human well-being.

These challenges, due to their scale, interconnections, and the systemic issues driving them, represent a unique period in human history, requiring unprecedented global cooperation and systemic changes – nothing less than a profound shift in worldviews, toward greater caring, connection and wisdom.

THE DISCLOSURE WORLD

CONTEXT FOR THE DISCLOSURE SCENARIO – RECENT EVENTS

- On December 16, 2017, the New York Times broke the story of a [secret government program to study UFO's](#), concurrent with the release of [US Navy F-16 videos of UAPs](#).
- In November 2021, US Senator Kirsten Gillibrand (D-NY) submitted an [amendment to the National Defense Authorization Act](#) of 2022 that would expand the duties and authority of a government office tasked with analyzing, evaluating and reporting on the UFO/UAP phenomena.
- In July 2022 [Department of Defense set up the All-domain Anomaly Resolution Office \(AARO\)](#) to, among other things, identify "unidentified anomalous phenomena" that could pose a threat to national security and the operations of the military and federal agencies.
- In the spring of 2023, [AARO provided both classified and public briefings](#) on the progress of its research into UAP's, while stopping short of claiming credible evidence of "extraterrestrial" presence. Many observers suspect that DoD is using AARO to stonewall the UFO issue.
- June 5, 2023, [news broke](#) that a former intelligence official turned whistleblower (David Grusch) had given Congress and the Intelligence Community Inspector General extensive classified information about deeply

covert programs that he said possess retrieved intact and partially intact craft of non-human origin. Members of both the House and Senate Intelligence Committees expressed interest in investigating these claims. Grusch claimed that the information being provided to Congress through AARO is not a complete or truthful picture.

- July 14, 2023, Majority Leader Chuck Schumer introduced [new legislation to declassify government records related to UAP](#). Going further, a provision in the new amendment declares that "any and all recovered [UFOs] and [biological evidence of non-human intelligence that may be controlled by private persons or entities](#)" shall be [transferred to the U.S. government](#) "in the interests of the public good."
- July 26, 2023, David Grusch repeated his above claims under oath, and on public record, during a Congressional hearing on [Unidentified Anomalous Phenomena: Implications on National Security, Public Safety, and Government Transparency](#).
- There is open speculation [if Schumer is quietly talking to Biden about how to break the truth to the American people](#). If it comes out that Biden knew the truth, and didn't say anything, he could pay a huge political cost.

But if he does come out and tell the truth, it could change the world forever, in unpredictable ways.

THE DISCLOSURE SCENARIO

Official acknowledgement of the ongoing presence of non-human intelligence and technologies on planet earth.

- The Senate Intelligence Committee conducts four months of closed hearings on all aspects of the UAP/NHI phenomenon.
 - The secret witness testimony and related documentation from these hearings proved to be so explosive, compelling, and far-reaching that the President decides to officially acknowledge the presence of NHI's and technology on planet earth.
 - After consulting with the US "Nine Eyes" intelligence-sharing partners (Canada, Denmark, Norway, Netherland, UK, France, Australia, and New Zealand), these leaders determine to make a joint announcement. The resulting set of coordinated press conferences are viewed by a global audience of 1.3 billion people.
- Despite tremendous behind-the-scenes pressure from segments of the defense-intelligence establishment, the President – in consultation with the congressional Gang of Eight – determine to convene open hearings with whistleblowers and evidence, subject to a pending review of classified military applications of UAP/NHI-related technologies.
 - In support of this process, Congress provides amnesty provisions for 6-12 months for all whistleblowers, executives, government personnel and corporations, provided full and complete disclosures are made.
 - Other nations (beyond the Nine Eyes) quickly join in an avalanche of disclosure the ripples throughout the global community.

POST- DISCLOSURE POSSIBILITIES

THE DYNAMICS OF POST-DISCLOSURE OPTIMISM

A set of discreet factors might well create the momentum needed for humanity to reach its full potential.

Outputs

- Elevated global, collective consciousness
- New tech applied to agriculture, transportation, medicine
- Free energy tech eliminates need for fossil fuels and nuclear power
- NHI help humans avoid dangers of advanced AI
- Increased living standards/reduced inequality (Universal Basic Income)

NHI Engagement Drivers

- More visible/positive/transformation contact
- Humans attempt more direct contact with NHI
- Shift to greater collective intelligence
- Reinterpret history/legends: a new origin story
- Hybrids become visible and active
- NHIs shift strategies to be more directly known
- New mindsets take hold (take care of the planet, nuclear disarmament, become a wiser more compassionate species)

Awakening to our full potential as universal beings

Spiritual/Psychological Drivers

- A growing "We are not alone" narrative
- Family/community healing with experiencers
- New world religions/spiritualities
- More experiences in multidimensional realities
- More practitioners of wisdom traditions
- More tangible sense of reincarnation
- Increased telepathy, psychic healing,
- Increased animal communication

Societal Drivers

- More specific/positive UAP reporting
- Positive coverage in mainstream media
- Hollywood reinforces new perspectives
- ET taboo/ridicule fades
- Creative renaissance in art, music, media
- Backlash against National Security State
- More academic understanding of the paranormal
- More STEM professionals incorporating insights
- Practical applications from new physics

THE POSSIBILITY OF POST-DISCLOSURE COLLAPSE

On the other hand, humanity's efforts may be overwhelmed by the nature of the [polycrisis](#) and the negative possibilities following disclosure.

A hard take on the current polycrisis

- Too many simultaneous crises
- Too much acceleration
- Too interconnected
- Too deeply systemic

The negative potentials within disclosure

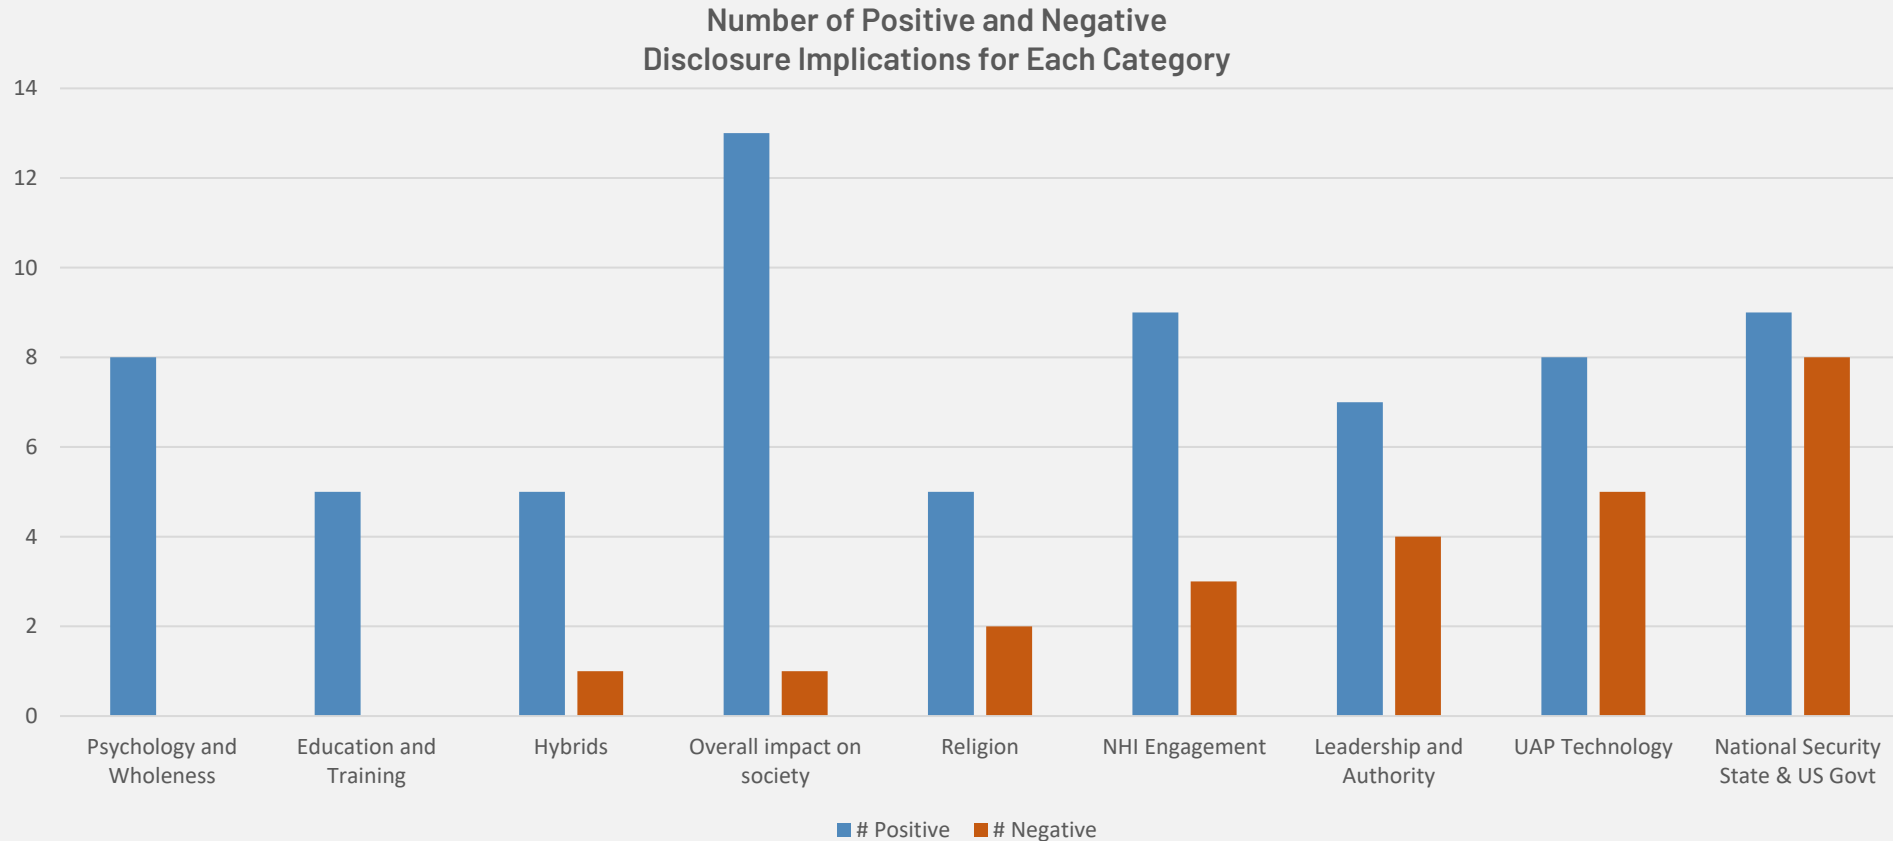

- Fear and division overtake hope and unity.
- Major institutions are already too fragile to handle the economic and psychological impact of disclosure.
- Technology/alliances will remain hidden and used for narrow interest, not the greater good ("Breakaway civilization").
- NHIs will not interfere and will allow humanity to destroy itself, citing the "prime directive."
- Or alternatively, NHIs are in control and don't have our interests in mind.

MAP OF POTENTIAL DISCLOSURE IMPLICATIONS BY CATEGORY

This graph shows the number of possible disclosure implications broken into nine categories. While every area has several positive implications (shown in dark blue) the number of potential negative implications (orange) increases as we move towards the right across categories.

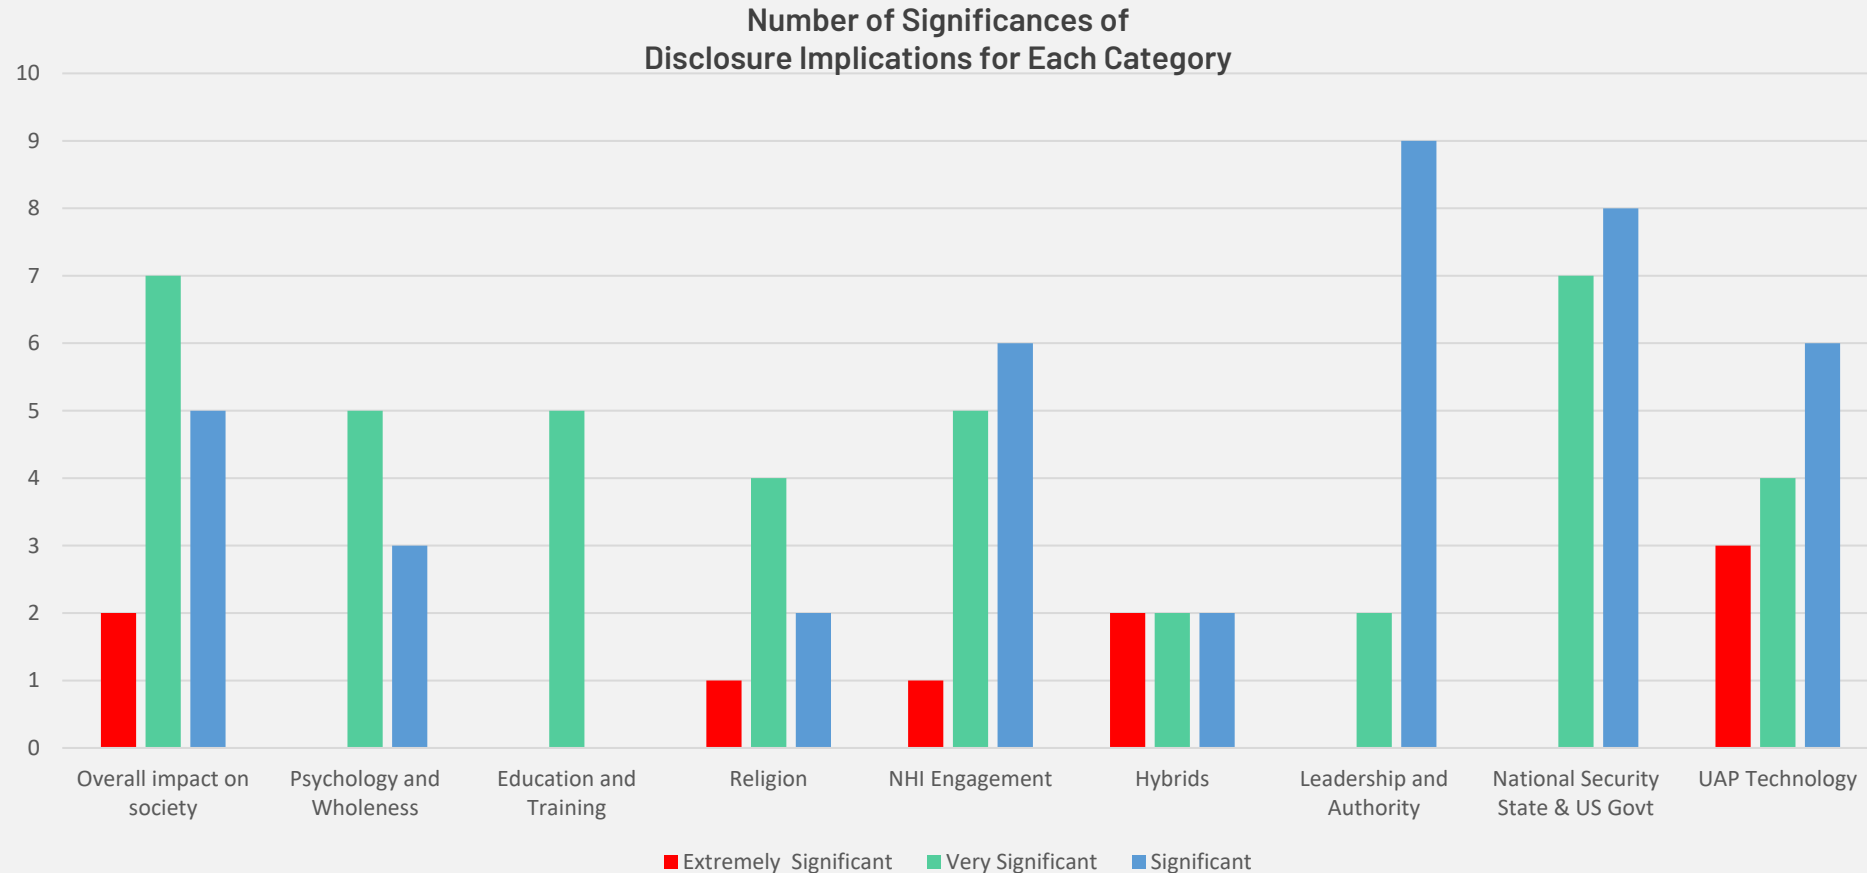

Note that this graph does not consider the relative significance of the impact of implications in each category (see next page).

CATEGORY ANALYSIS...

This graph continues the analysis of the potential significance of the disclosure implications by category.

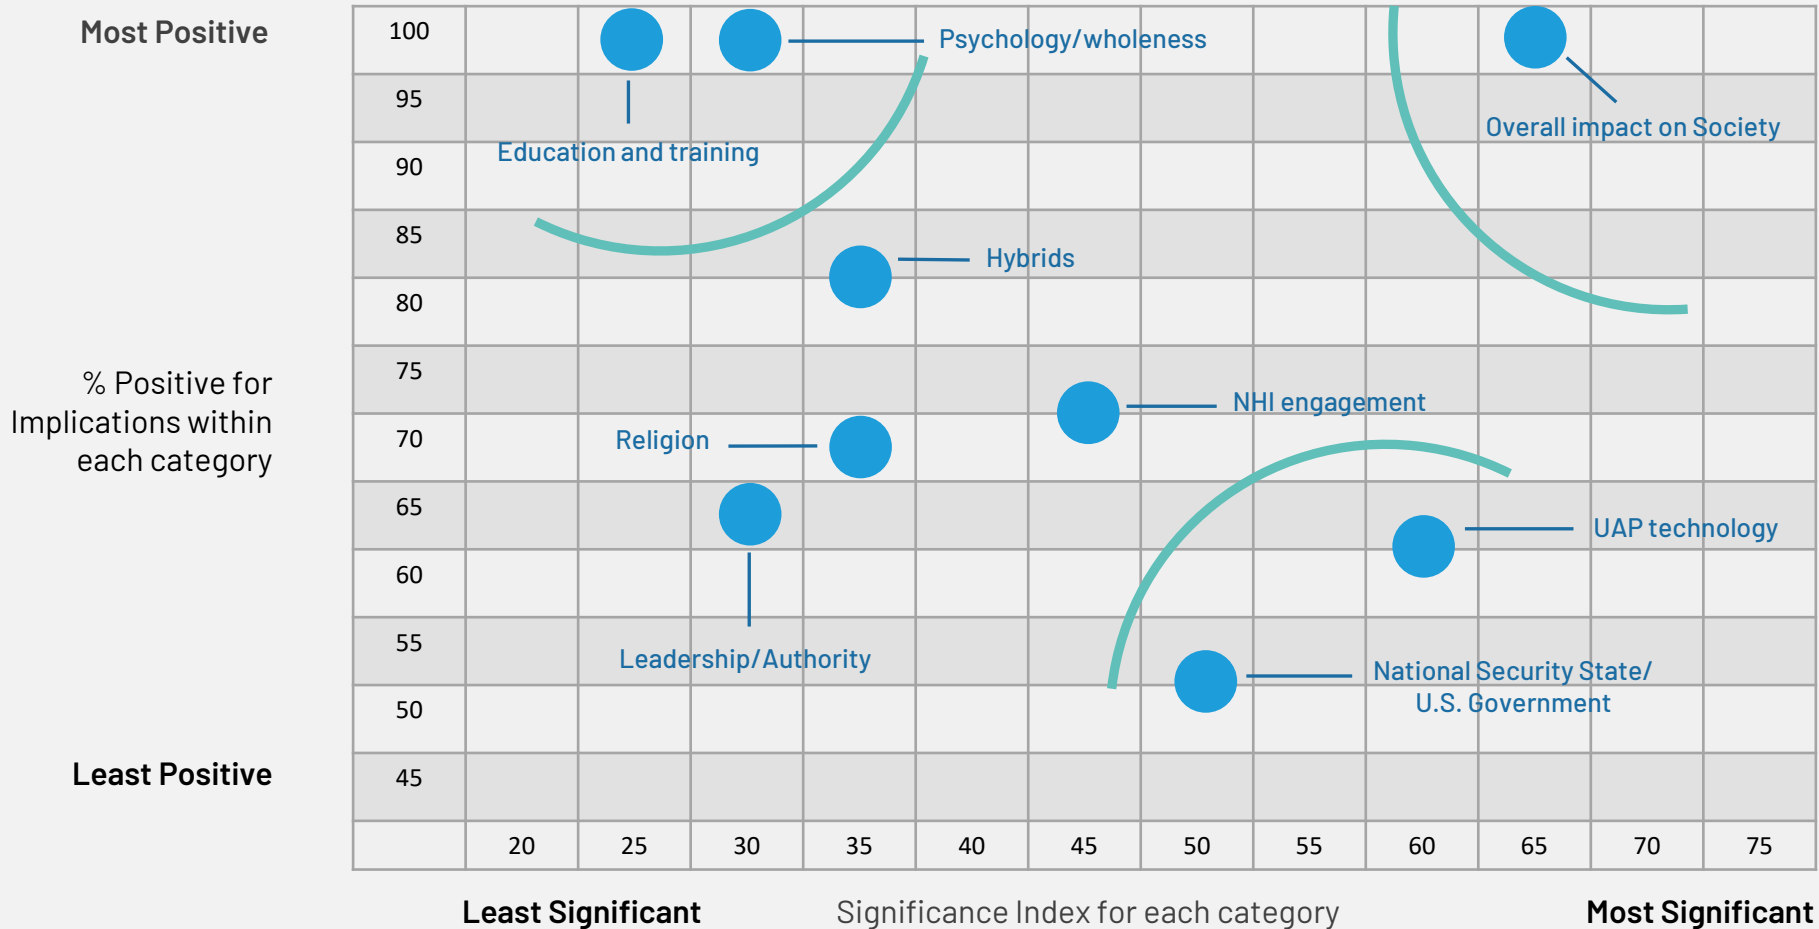

“Significant” implications are shown in blue, “Very Significant” in green and “Extremely Significant” in red.

CATEGORY ANALYSIS...

“Overall Impact on Society” ranks highest in terms of significance and positivity (the upper right corner of the graph), with some important caveats. First, we characterize as positive some things we consider as “necessary chaos.”

Secondly, we place many of the potential big potential negatives under “UAP technology” and “National Security State/U.S. Government” (the lower right corner). For sure, there are also positive potentials within these categories as well. The unambiguously positive categories are “Education and Training” and “Psychology/wholeness.”

Each ‘extremely significant’ potential implication is 10 points; each ‘very significant’ is 5 points; each ‘significant’ is 2 points.

DATA FOR THE CATEGORY ANALYSIS

Area	# Positive	# Negative	% Positive		Extremely Significant	Very Significant	Significant	Significance Index
Overall impact on society	13	1	93%		2	7	5	65
Psychology and Wholeness	8	0	100%		0	5	3	31
Education and Training	5	0	100%		0	5	0	25
Religion	5	2	71%		1	4	2	34
NHI Engagement	9	3	75%		1	5	6	47
Hybrids	5	1	83%		2	2	2	34
Leadership and Authority	7	4	64%		0	2	9	28
National Security State & US Govt	8	7	53%		0	7	8	51
UAP Technology	8	5	62%		3	4	6	62
	68	23	75%		8	47	34	--

For the Significance Index, each 'extremely significant' potential implication is 10 points; each 'very significant' is 5 points; each 'significant' is 2 points.

POTENTIAL “EXTREMELY SIGNIFICANT” EVENTS BY CATEGORY

Positive events . . .

Potential Implication	Type of Impact	Extent of Impact
Soon things will get even more chaotic. We will experience both a regressive tendency and a catalytic movement to being more progressive/integrative. All the possibilities will be amplified. (10)	Necessary Chaos (Positive)	Extremely Significant
Disclosure fractures society into groups. Those that want to respond openly/creatively, and groups that fear the changes, feel disempowered or threatened, and potentially respond with violence. (7)	Necessary Chaos (Positive)	Extremely Significant
There is a wide-spread emergence of new world religions/spiritualities, based upon the mystical traditions but with a 21st-century multidimensional and galactic consciousness that connects with our cosmic friends and allies. (8)	Positive	Extremely Significant
Initially, NHI will continue behaving much in the same way as before disclosure. Most will try not to impose their presence upon us. However, as society adapts, some NHI’s will gradually shift their strategies to make their presence more clearly known. (2)	Positive	Extremely Significant
As humanity evolves, some NHI’s will become more proactive in making technology adaptable to addressing global crisis. (New)	Positive	Extremely Significant

“EXTREMELY SIGNIFICANT” EVENTS...

Negative events . . .

Potential Implication	Type of Impact	Extent of Impact
As disclosure reveals more about "What do they want?," a troubling narrative takes shape. At least some NHI elements appear to be pursuing goals not in alignment with human thriving. (5)	Negative	Extremely Significant
A hidden “breakaway civilization” comprised of groups of humans with access to powerful technology, including a secret 'space force', operates in cooperation with some NHI. (5)	Negative	Extremely Significant
Global inequities worsen as new technologies are commercialized and only shared with close allies and those who can afford them. The combination of new UAP technologies and advancements in AI lead to massive unemployment and social revolt. (7)	Negative	Extremely Significant
The net financial impact of disclosure will be catastrophic due to the loss of market capitalization by large legacy players in the markets impacted by the new technologies. A global collapse in stock markets around the world results in an increase in bond prices, particularly US Government bonds. (9)	Negative	Extremely Significant

PARTICIPANT REFLECTIONS

PARTICIPANT HOPES

- My biggest hope/wish is that we, as a human race, awaken to our full potential as universal beings and that the core values that pervade our world and those beyond are harmony, equality, mutual respect, and a recognition of the interdependence of all life sentient and non-sentient.
- My hope is that we, as humanity, utilize disclosure to bond together and to take the next steps towards a global awakening of consciousness. We move away from our rigid materialist mindset and start to appreciate that we are all connected, and we should actually care about each other, the earth, etc.
- My hope is for the awakening of humanity to its purpose, place and potential due to an expanded view of itself and the Universe around it provided by NHI. Then a collective effort, with off-world help and advice, and our willing participation, to start solving the multiple interlocking crisis the planet is going through.

“My hope is that we, as humanity, utilize disclosure to bond together and take the next steps towards a global awakening of consciousness.”

- My biggest hope is that disclosure serves to create more love - the ability to look beyond difference - gender, race, species, politics, religion - and to be less polarized as a global community AND to foster open, flexible, creative worldviews.
- Hope for waves of gratitude, acceptance and love for all beings.
- Hope that power dynamics are transitioned in a peaceful manner.

PARTICIPANT FEARS

- My biggest fear would be that rather than propelling us forward and taking the next evolutionary step, disclosure exacerbates the polarization and divisiveness in modern society. All our institutions are pretty fragile at this point, and it's not too hard to see how disclosure could precipitate their collapse. A lot of suffering would ensue.
- My biggest fear is that technology that is already developed using free energy and alien technology will remain hidden or exploited by those in power and in the know and not be used for the benefit of all.
- My fear is that NHIs will not interfere and allow humanity to destroy itself, citing the "prime directive."

"My biggest fear is that technology already developed using free-energy and alien technology will remain hidden or exploited by those in power."

- Humanity is already severely polarized in most arenas of human interaction. This massive system overload of information, technology, new belief systems, media input etc. could fracture societies even more than they now are, blocking much of the positive changes that could be made by an open exchange with NHI.
- Disclosure will exacerbate the context of polarization, misinformation and resignation that we are already living in. Disclosure and the collective response will create and exacerbate trauma and the harmful reactive responses that follow from this.

PARTICIPANT FEARS

- My fear is that the explosive nature of the reality of NHI will lead to narrative wars that produce division, mistrust, and general panic/terror - a real meltdown of civil society including economic collapse of one sort or another.
- My fear is that disclosure gets co-opted by the power structures for its own purposes, that divisions and disempowerment are deepened.
- My biggest fear is an acceleration and expansion of the current global dysfunction leading to the total annihilation of the human race and destruction of Planet Earth.
- My existential fear that is that NHIs have control of us and don't have our interests in mind.
- One fear is that there is nothing to disclose after all.

PARTICIPANT TAKE-AWAYS FROM THIS EXERCISE

- Inevitably there will be a period (decade +) of chaos and confusion with both the shadow and the light emerging - the best and the worst of humanity. It will contain elements of Armageddon and Aquarius and our collective consciousness will determine the path we follow and with whom - NHI - we share the journey with!
- I have a hard time seeing how disclosure just ends up being neutral or a shoulder shrug. I feel that it's going to be extremely positive or extremely negative. That may hinge, in large measure, on the desires or intentions of the NHI and how they want to relate with us. But we will play a pivotal role too, and I think we need to be prepared.
- My take-away is hope that collectives will overcome the selfishness, greed and unconsciousness of the few or the minority.

“I have a hard time seeing how disclosure just ends up being neutral or a shoulder shrug.”

- Talking to people about this who are already overloaded with input, depressed about their individual and collective future, and angry at being lied to continually by their leaders, it would take some fast and productive on-the-ground upgrades to their immediate lives to get things moving on a large scale of trust and acceptance of NHI who seem to want to play a role in our future.
- My take-away is that it is predictable to expect the worst of humanity, while at the same time reinforcing more generative and adaptive responses. There will need to be some powerful disclosure to break through the polarization and trauma we live in.

PARTICIPANT TAKE-AWAYS...

- Who knows what's out there? It's extremely scary. It's extremely exciting. It could go in infinite directions, and it is going in infinite directions. Will it be something that's good or negative? Will it divide us more or unite us more? Yes to all of the above. Will it be our salvation, or will we have some huge destructive technology unleashed on us? Yeah probably all of that. What can we do other than ride with it and take it all in stride?
- We are in for a hell of a ride. . . There will be much good and lots that is hard or difficult . . . This is amazing - it is truth coming out. We can HANDLE the truth! . . . Earth Humanity is becoming Galactic!

“Who knows what’s out there?
It’s extremely scary.
It’s extremely exciting.”

- There is a major paradigm shift occurring. It may be a 50 year or 500 year, or 22,000 year cycle, and we are stretching and exercising our memory of these cycles. We may be experiencing inflections into a golden era, or into devastation, or somewhere in-between.
- We can't really know what will happen, which is a vulnerable state. Articulating it clearly can help us think it through and familiarize ourselves with possibilities.

DETAILED FINDINGS

OVERALL IMPACT ON SOCIETY

Potential Implication	Type of Impact	Extent of Impact
Awareness of UAP/NHI phenomenon will inevitably increase, with significant yet unpredictable impacts. There will be no returning to the “old normal.” (2)	Positive	Very Significant
Initially, most of the public reacts to disclosure with disengagement because they do not perceive any connection to their everyday lives - particularly in the short term. In addition, disclosure happens within a culture saturated with misinformation and skepticism toward governments, and a general fatigue with big global issues. (5)	Negative	Very Significant
Soon things will get even more chaotic. We will experience both a regressive tendency and a catalytic movement to being more progressive/integrative. All the possibilities will be amplified. (10)	Necessary Chaos (Positive)	Extremely Significant
Disclosure fractures society into groups. Those that want to respond openly/creatively, and groups that fear the changes, feel disempowered or threatened, and potentially respond with violence. (7)	Necessary Chaos (Positive)	Extremely Significant
Disclosure will prompt a re-examination of deeply held assumptions and beliefs. This accelerates an expansion of worldviews from the modernist--positivist--materialist to the postmodernist--integrative--post-materialist. Consciousness is seen as a primary aspect of reality rather than an epiphenomena of complex matter. (11)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

OVERALL IMPACT ON SOCIETY...

Potential Implication	Type of Impact	Extent of Impact
Decades of extraterrestrial taboo and ridicule fades quickly . People openly engage in conversations about their own contact experiences. This change is amplified by a cycle of positive coverage in the mainstream media , social media, shows interviewing experiencers, documentaries, scientific acceptance, and academic research. (5)	Positive	Very Significant
There will be a daily drumbeat of new, more specific UAP reporting because of legitimization of the phenomenon and the development (or declassification) of data from multiple sources. (2)	Positive	Very Significant
Deep fakes make it harder to understand what is real . There will be more sophisticated UAP/NHI hoaxes or misinformation, with video and multiple witnesses, often promoting sensationalist or fearful responses. (6)	Negative	Very Significant
Hollywood shifts from narratives that focus upon battles with aliens to films depicting human-NHI relationships with galactic perspectives that explore the deeper mysteries of reality. Documentaries will appear exploring the actual phenomenon, contact experiencers, new sciences and consciousness studies. The science-fiction genre will enjoy a big uptick in production and sales across all media.(1)	Positive	Significant
There will be a creative renaissance in art, music, books, media as humanity embraces multidimensional awareness and a more galactic perspective. Many explore themes related to extraterrestrial life, imagining scenarios, and speculating on the cultural, social, and philosophical implications of such encounters. (2)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

OVERALL IMPACT ON SOCIETY...

Potential Implication	Type of Impact	Extent of Impact
There is a new energy and enthusiasm for international treaties to reduce nuclear weapons, and eventually enact bans. (3)	Positive	Very Significant
People reduce consumption of animal protein (poultry, beef, pork, lamb) by 50% in the next 5 years. This is partly due to a broader consideration for all sentient life, and partly the result of a desire to attune the body for practices in consciousness and subtle awareness. (0)	Positive	Very Significant
People re-establish their relationship with the land, food, and the management of waste , moving away from the industrial capitalist agriculture of the past.	Positive	Significant
Decades of taboo and ridicule around the notion of advanced prehistorical civilizations fades quickly. Research and narratives of Atlantis and Lemuria as advanced prehistoric civilizations will be reconsidered. There will be a renewed interest in reinterpreting history and legends to include NHI and a galactic perspective . New stories of the origins of humanity will arise that help to make sense of NHI realities. (6)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

PSYCHOLOGY/WHOLENESS

Potential Implication	Type of Impact	Extent of Impact
Formal and informal groups at all levels of society (families, local community groups, social media, think tanks, self-proclaimed authorities) explore the profound implications of disclosure: Who are we? What are we doing? Where are we going? What is our role in the galaxy? People will re-examine how they want to live their lives.(8)	Positive	Very Significant
Subcultures exploring and experiencing expanded multidimensional realities and consciousness will thrive due to the amplifying impact of NHI contact, the psychedelic revolution, AI, DNA modification, etc. Over time, these subcultures work their way into mainstream. (2)	Positive	Significant
Since a lot of families/communities have someone in them with contact experience, there will be a process of family/community reconciliation , and a reconsideration of accounts that were previously dismissed or ridiculed. (1)	Positive	Very Significant
Humanity will experience a longer and more fluid sense of time. The notion of reincarnation becomes more tangible, time travel possibilities are considered, remote viewing into the past and future is explored. The idea that some NHI live for hundreds and perhaps thousands of years prompts exploration into human longevity. (4)	Positive	Very Significant
Decades of PSI taboo and ridicule fades quickly . Years of academic research into the paranormal will become more widely known and accepted. There will be rapid and widespread changes in the understanding of the nature of consciousness , and the consciousness of nature. (8)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

PSYCHOLOGY/WHOLENESS...

Potential Implication	Type of Impact	Extent of Impact
Psychology departments will quickly create courses for dealing with a range of NHI-related issues such as epistemic and ontological shock, traumatic contact experiences, and depression . Pop psychology authors will publish books on “How to deal with NHI disclosure.” (3)	Positive	Significant
Therapists transition surprisingly quickly from diagnosing psychiatric illness to recommending wisdom tradition practices to assist people with their evolving consciousness resulting from disclosure. (3)	Positive	Significant
Wide-spread interest in, and exploration of, beliefs of indigenous/first nation cultures and society that have always made room for a family/community beyond this world. (Aboriginal, Native American, Māori, Shamanistic...) (2)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

EDUCATION & TRAINING

Potential Implication	Type of Impact	Extent of Impact
People will seek information (documentaries, podcasts and books) by experts that have a deeper understanding of NHI-related topics. Research involving contact experiencers will become popular. Enrolment in NHI-related courses will experience a dramatic increase. (2)	Positive	Very Significant
Interest and training in human potential will accelerate in areas such as learning to communicate telepathically, psychic healing, animal communication, meditation techniques and consciousness technologies. (2)	Positive	Very Significant
The academic focus on UAP and anomalous phenomena expands beyond a nuts-and-bolts emphasis to include the humanities and social sciences. (2)	Positive	Very Significant
Disclosure boosts interests in science, technology, engineering, and mathematics (STEM) and leads to increase in public funding for research institutions. There will be greater interest in and funding for, quantum science and theories that may help us understand faster than light (FTL) travel, warp drives, time travel, wormholes. (0)	Positive	Very Significant
There will be an explosion of interest in the new physics, space programs (government, private and military), exobiology and xenology. The paranormal, near-death studies, remote viewing and subtle energies will no longer be seen as 'fringe science'. (1)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

RELIGION

Potential Implication	Type of Impact	Extent of Impact
There is a wide-spread emergence of new world religions/spiritualities , based upon the mystical traditions but with a 21st-century multidimensional and galactic consciousness that connects with our cosmic friends and allies. (8)	Positive	Extremely Significant
Disclosure will change global consciousness in a way that brings us all together , as human differences are perceived in the light of potential NHI diversity. A “We are not alone” narrative unites people around a common dialogue about our place in the universe. (3)	Positive	Very Significant
Disclosure will initiate an interest in interdimensional realities and the means to enter them. There will be an interest in reincarnation and other multidimensional perspectives.(1)	Positive	Very Significant
The dominant religions generally succeed in accommodating non-human beings into their doctrines (although membership nevertheless declines). Membership in the “big brand” religions (Christianity, Islam, Hinduism, Buddhism, Taoism) drop by 50%. (1)	Positive	Very Significant
There is an increased following for existing channelers (and many new ones) claiming to be a direct intermediary or ambassador of various NHI and NHI organizations. The quality and motives of this group is extremely diverse with skilled professionals, novices, opportunists and tricksters. (1)	Positive	Significant
Some evangelical and fundamentalist religious groups strongly reject or demonize NHI presence. Many support apocalyptic scenarios. Some begin persecution of contactees/experiencers and others associated with the new realities. Some have powerful political allies. (7)	Negative	Very Significant
Religious cults like Heaven’s Gate spring up around the world, believing that their followers were extraterrestrial beings and that the earth was soon to be wiped clean, renewed and repopulated by alien beings. (2)	Negative	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

NHI ENGAGEMENT

Potential Implication	Type of Impact	Extent of Impact
The emotional intensity of disclosure begins to trigger large numbers of contact experiencers to consciously remember , in detail, information and experiences they had on NHI craft, even decades earlier. (1)	Positive	Very Significant
Extensive research confirms findings from 2014-2017: only 33% of experiencers considered themselves “abducted”; 85% of contact experiences were transformative (e.g. becoming more loving toward others, overcoming fear of death, discovering the purpose of their life) ; about 60% reported experiences of precognition following contact. (3)	Positive	Very Significant
Many will attempt to initiate direct contact with non-human intelligence using a combination of meditation, consciousness techniques and remote viewing (adapting the methods used by indigenous cultures, CE5 practitioners, Monroe Institute, etc.). There is a sufficient rate of success to encourage broader engagement. (3)	Positive	Very Significant
Multiple galactic races interacting with humanity are seen to have a more advanced understanding and control of consciousness, and even share a collective intelligence. (4)	Positive	Significant
We come to more clearly understand that technology and consciousness cannot be separated (e.g. breaking the subjective/objective duality). For example, we recognize that UAP craft are often controlled by the consciousness of the pilot. (1)	Positive	Significant
The NHI message to “Take better care of the planet” provides a massive boost to the environmental and anti-nuclear movements. (7)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

NHI ENGAGEMENT...

Potential Implication	Type of Impact	Extent of Impact
Sensationalist aspects of the NHI phenomenon are revealed, such as "terrifying abductions", "hostile reptilians", "sexual assault" and "mind-control implants" . This results in increased trauma and some panic among experiencers and the public. (6)	Negative	Very Significant
As disclosure reveals more about "What do they want?," a troubling narrative takes shape. At least some NHI elements appear to be pursuing goals not in alignment with human thriving . (6)	Negative	Extremely Significant
The optimistic idealism held by those who consider themselves 'spiritually evolved' may be blind-sided by actual threats posed by some non-human civilizations and our misuse of their technologies. (3)	Negative	Significant
Whatever the specifics, it becomes clear that non-human intelligence has a strong interest in human genetics .	Positive	Significant
When exobiology confirms the existence of simple life outside our solar system , active engagement of NHIs on planet earth becomes more credible for many more people. (1)	Positive	Significant
As disclosure reveals more about "What do they want?," a generally positive narrative takes shape (take care of the planet, nuclear disarmament, evolve to a wiser, more compassionate species) . (6)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

HYBRIDS

Potential Implication	Type of Impact	Extent of Impact
Human genetics includes elements from off-planet species seeded eons ago.	Positive	Significant
Claims made by NHI-human " hybrids " are taken seriously by an increasing segment of the general public.	Positive	Very Significant
The realization that non-human intelligence is already here, on and around planet earth, will make many fearful of their safety, security and well-being. Many people become suspicious, fearful and unwelcoming. (4)	Negative	Very Significant
Some hybrids act as ambassadors and cultural interpreters for different NHI civilizations who wish to develop more open contact with humanity. (1)	Positive	Significant
Initially, NHI will continue behaving much in the same way as before disclosure. Most will try not to impose their presence upon us. However, as society adapts, some NHI's will gradually shift their strategies to make their presence more clearly known. (3)	Positive	Extremely Significant
As humanity evolves, some NHI's will become more proactive in making technology adaptable to addressing global crisis.	Positive	Extremely Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

LEADERSHIP & AUTHORITY

Potential Implication	Type of Impact	Extent of Impact
There will be competition and confusion over who has authority to speak with credibility about NHI-related phenomenon and issues. Conversations become emotional, ego-based and irrational. Mixed messages from different governments and factions within governments increases feelings of disorientation and in cohesion. (8)	Negative	Very Significant
In many countries people will pressure officials to find out more and reveal more. There will be a competition within, and between countries, to see who can reveal more, to see who is better informed and can gain more credibility on NHI issues. (1)	Positive	Significant
It becomes clear that many governments have had policies and practices to discredit sources of NHI information for decades. This adds to a growing mistrust of authority. Some countries with rigid hierarchical, or otherwise compromised, governance structures become unstable due to populous empowerment movements. (2)	Negative	Significant
The United Nations takes a leading role in the global exploration and communication with NHI, although it struggles to reconcile creative versus reactive elements within its membership. (2)	Positive	Significant
The Vatican , as a globally recognized religious entity, could potentially serve as a mediator or intermediary in any interactions between humanity and non-human intelligences, leveraging its centuries of diplomatic experience and worldwide network of followers.(2)	Positive	Significant
A variety of new organizations will form to respond to the felt need for a global response to disclosure. (2)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

LEADERSHIP & AUTHORITY...

Potential Implication	Type of Impact	Extent of Impact
People will seek communities that have some understanding of NHI-related topics as they attempt to make sense of the new reality with like-minded people. Numerous UFO affinity groups gain massively in membership and funding (MUFON, CSETI, TTSA...). (1)	Positive	Significant
If disclosure happens during a national election campaign cycle (such as 2024 in the US), most candidates will quickly get up to speed on the issues and facilitate a generally rational and holistic response. (0)	Positive	Significant
If disclosure happens during a national election campaign cycle (such as 2024 in the US), some candidates will take positions that amplify fear and “otherness,” thereby contributing to reactive, and perhaps violent action. (4)	Negative	Very Significant
The initially bipartisan approach to disclosure breaks down over disagreement over policy responses: Should we boost defense spending? Should we form a new agency to attempt contact or negotiations? Should the U.S. cede control to an international body? What kind of research justifies funding? (3)	Negative	Significant
Millennials and Gen Z react against to Baby Boomer dominance in major institutions and usher in an era of younger leadership. (1)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

NATIONAL SECURITY STATE & U.S. GOVERNMENT

Potential Implication	Type of Impact	Extent of Impact
The US Senate Intelligence Committee not only discovers retrieved craft of non-human origin , as claimed by David Grusch, but also multiple bodies of beings believed to be the pilots or occupants of such craft. Extensive photographs and witness testimony about these are made available to the public. (4)	Positive	Very Significant
The Senate Intelligence Committee finds no evidence of recovered UAP craft , as claimed by David Grusch and others. Some believe that there was never any truth to these claims (" Nothing there "). Others believe that the defense establishment successfully subverted the investigation through misdirection, intimidation and/or political pressure. (" Nothing to see "). (6)	Negative	Very Significant
The sovereignty of national governments is strongly eroded , given that they cannot match UAP military technology. Trust collapses as more decades-long cover-ups become exposed. (5)	Negative	Significant
Factions within the national security state shape the disclosure narrative using misinformation, intimidation and over-classification of "national security" content . Further disclosure is limited, and mainstream media ignores the issue. NHI "narrative wars" break out . (6)	Negative	Very Significant
Those wanting to control the post-disclosure narrative will intermittently shut down the internet or use other disruptive tactics to create chaos and confusion . (8)	Negative	Significant
The major U.S. defense contractors are largely able to protect their secret military programs and budgets . (7)	Negative	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

NATIONAL SECURITY STATE & U.S. GOVERNMENT...

Potential Implication	Type of Impact	Extent of Impact
It becomes clear that rogue elements within the military-industrial complex are already coordinating with some NHI for mutual self-interest . Increased visibility brings exopolitical instability, and the risk of direct confrontation with some NHI. (6)	Negative	Very Significant
Some human authorities have made agreements with some NHI groups decades ago. (0)	Negative	Very Significant
There will be a backlash of opinion against the 'Military-Industrial Complex , some government agencies, and NASA. There will be a desire to "clean house" as part of a push toward some accountability . The scale of secret 'Military Industrial Complex' activity will become more transparent and subject to greater scrutiny and criticism. (6)	Positive	Very Significant
Countries continue to compete fiercely for military/technological superiority, including in many secret black ops programs. However, this does not mean "business as usual," as there is greater sharing of knowledge and management by civilian authorities. (1)	Positive	Significant
Disclosure results in charges of criminal activity against many in the defense and intelligence communities (theft, fraud, violation of civil rights, assault). Intense conversation begins on the pros and cons of granting amnesty vs prosecuting for 'crimes against humanity'. (0)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

NATIONAL SECURITY STATE & U.S. GOVERNMENT...

Potential Implication	Type of Impact	Extent of Impact
NASA and its astronauts , released from DOD secrecy constraints, reveal a long history of observing UAP activity , supported with convincing evidence of NHI on Earth, the Moon, Mars and other bodies in the Solar System. (3)	Positive	Significant
The US reveals that US Space Force has recently developed a capacity to monitor and track UAPs entering Earth space/atmosphere/oceans and has some defensive capacity. (0)	Positive	Significant
There will be a surge in the public and private financing of international space-stations and bases on the Moon and Mars . Artemis and private space-based projects move ahead quickly. (1)	Positive	Significant
Programs exploring extraterrestrial life through SETI, astrobiology or xenology will be closed or undergo a dramatic revision after re-examining existing assumptions in the light of disclosure.). (1)	Positive	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.

UAP TECHNOLOGY

Potential Implication	Type of Impact	Extent of Impact
A hidden “breakaway civilization” comprised of groups of humans with access to powerful technology, including a secret 'space force', operates in cooperation with some NHI. (6)	Negative	Extremely Significant
The United States has spent billions in black ops programs to reverse engineer recovered UAP technology, with little practical results. The technology appears to be largely beyond human understanding. (4)	Negative	Significant
Supported by public opinion and rulings by the Supreme Court , the Administration and Congress force the Department of Defense and defense contractors to publicly release materials and technologies obtained from retrieved UAP craft. However, any military applications derived from these technologies remain classified for 'national security'. (1)	Positive	Significant
A combination of new technologies in agriculture, transportation, medicine and elevated global consciousness, will raise living standards and reduce inequality. The impact of NHI knowledge will expand to how we grow our food, how we heal our bodies, how we spend our time. (5)	Positive	Very Significant
Free energy technologies will help solve problems caused by technologies based on fossil fuels and nuclear power. (3)	Positive	Very Significant
Technology will facilitate a world of plenty enabling many governments to implement a Universal Basic Income (UBI). (8)	Positive	Very Significant

The number in parenthesis indicates the number of respondents who placed this implication in their “Top-10” list.

UAP TECHNOLOGY...

Potential Implication	Type of Impact	Extent of Impact
Non-human intelligence helps us navigate the dangers posed by exponentially advancing AI capabilities. (1)	Positive	Significant
There has been a century-long conspiracy to suppress promising Free Energy technologies, as alleged by Steven Greer. Assuming only half of these claims are true, mankind can make free energy commercially available in just a couple of decades. (4)	Positive	Significant
Free energy proves to be a double-edge sword in that it unleashes the worst of current consumption practices hastening climate change and global inequalities. (2)	Negative	Significant
Global inequities worsen as new technologies are commercialized and only shared with close allies and those who can afford them. The combination of new UAP technologies and advancements in AI lead to massive unemployment and social revolt. (8)	Negative	Extremely Significant
There will be heavy investment in sectors that will benefit from the application of UAP technology in energy, transportation, communication, biotech, material science, and agriculture. Major gains will be experienced by companies such as NextEra Energy, Alphabet, Moderna, Beyond Meat, Applied Materials, CRISPR Therapeutics, First Solar and Intuitive Surgical. Billions of dollars will flow into new technology start-ups. (10)	Positive	Very Significant
The net financial impact of disclosure will be catastrophic due to the loss of market capitalization by large legacy players in the markets impacted by the new technologies. A global collapse in stock markets around the world will result in an increase in bond prices, particularly US Government bonds. (10)	Negative	Extremely Significant
The established power structures disproportionately benefit from the wealth created by whatever applications of new technologies (science, medicine) are utilized to address global issues.	Negative	Significant

The number in parenthesis indicates the number of respondents who placed this implication in their "Top-10" list.
